“Garmin InReach” Satellite Tracking and communication System

1. Each crew/rider will use the latest “Garmin InReach” satellite tracking and communication functionality together with the Geotraq Rally Safety System.
2. With inReach satellite technology from Garmin competitors can stay in touch globally. They can send and receive messages, track their movement and if necessary, trigger an SOS to get help from a 24/7 global emergency response coordination center or the Rally Control via the 100% global Iridium® satellite network.
3. Enduro & ATV riders will receive an additional “Garmin InReach Mini” device.
4. SSVs, CARs & Trucks, will receive a Garmin Montana 700i as NAV-GPS system with integrated InReach functionality.
5. The Rental of the Garmin Montana 700i and Garmin InReach Mini is included in the entry fee. Deposit must be paid at the administrative check.
6. Each device will have the following features active:
 - a. Direct satellite tracking in 2-5 minutes intervals
 - b. Use pre-set messages to communicate with the rally control:
 - All OK.
 - Technical Help Request. We are OK, but we need a recovery to come and help.
 - c. Trigger SOS to get help from the Rally Control in case of Medical emergency
7. The Satellite tracking by InReach will be included in the public Live tracking page of the rally.
8. **IMPORTANT: Read the operation manual:**
 - Garmin Montana 7xx operation manual: [OPEN LINK](#)
 - Garmin InReach Mini operation manual: [OPEN LINK](#)
